Common Laboratory Equipment

Formal Lab Report Format

Introduction

Write a paragraph to introduce the concepts covered in the lab. For example, if the lab is about chromatography, write a paragraph about what is chromatography, what is it used for in the world, etc.

Purpose

What is the purpose of the lab? Why are you doing the lab? What are you going to learn? You can write this section in point form.

Materials and Procedures

Write this sentence: "Refer to the _____ lab handout." If the lab is called Factors Affecting Reaction Rates, the sentence in this section should read "Refer to the Factors Affecting Reaction Rates lab handout."

Never copy down all the materials and procedures from the lab handout. If the teacher makes any changes to the list of materials and procedures, write them down here. If you changed anything during the lab, write them down here.

Observations and Data

Put all the data you have collected in an organized table. Data tables should have a name on top of them like the following:

Table 1: Volume of NaOH added per trial.

Trial	Volume of NaOH (mL)
1	20.55
2	20.61

Write down important qualitative observations.

Results

Answer all the calculation questions here. If there are graphs, place them here. Any pictures or graphs should have an italicized title underneath them like the following:

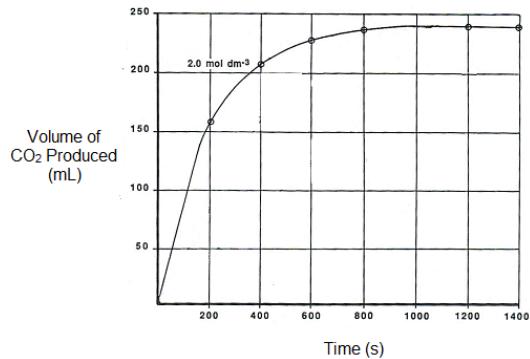

Figure 1: Volume of CO₂ produced in mL over time.

Discussion

Answer all the written lab questions here in complete sentences.

Conclusion

Write a short paragraph to summarize your final results. The paragraph should answer any questions stated in the purpose.

Lab Report Grading

Section	Marks

Format <ul style="list-style-type: none"> • There is a title page with the title underlined. The title page also includes your name, partner(s) name(s), and date • All sections are in the correct order • All section titles are underlined • If the report is typed, the font is Times New Roman, size 11-12, 1.5 spaced. • The report is written in third person, passive voice (no "I", "we", "you") 	No marks for correct formatting. Incorrect formatting results in a maximum of -2 marks.
